"... empowerment has come to the women of Bangladesh -- even the poorest women in Bangladesh. It's tremendous. It's a dramatic change that has taken place. Women have access to money. They can now plan. They can now dream. Their children are in school. ... New communities are emerging. A new generation is emerging."

~ Dr. Muhammad Yunus,
founder, Grameen Bank &
2006 Nobel Peace Laureate

"Respect for women is a prerequisite for success of countries in the modern world. In the dynamic 21st century no society can expect to flourish with half its people sitting on the sidelines, with no opportunity to develop their talents, to contribute to their economy or to play an equal part in the lives of their nations."

~ Condoleezza Rice,
US Secretary of State

presented in collaboration with Rotary District 5150 & Global Initiative to Advance Entrepreneurship

Attendance Limited to 120
